**SUBJECT: PEDICULOSIS (HEAD LICE)**

The Port Jervis City School District recognizes the fact that Pediculosis or head lice is a highly contagious condition, especially among elementary school students. The District further recognized the need to protect our students from possible infestation. Therefore, once a case of Pediculosis has been diagnosed, the Port Jervis City School District endorses a nit-free policy for readmission to school.

Specific procedures to implement this policy will be developed by the health staff, in conjunction with building administrators.

Adopted: 3/18/03
